DATA PRIVACY, PROTECTION AND CYBERSECURITY

Course Overview

The core business of hospitals delivering just care services is of the past. Hospitals' business is rapidly evolving towards meeting customers' demand for a seamless care experience. To achieve this, hospitals are investing resources to review its processes so that staff and clinicians can deliver the right care, in the right place and at the right time. This helps hospitals reduce costs and retain revenue, and also improving patient health outcomes and experience.

This course brings to the class fundamental knowledge of Data Protection and Privacy from PDPA and Cyber Security.
The topics on this course are essential as they help all employees in the medical practice industry to understand the needs to safeguard patients' personnel data from the wrong hands.

Join this course to learn about PDPA obligations, as well as security risks and their common attack methods.

Level: Basic

Who Should Attend

All employees within organization who needs to collect, use and disclose personal data in the course of their work on regular basis.

Topics
